# Prevention Is Better Than Cure

Have you imagined a time when an Ultrasound, ECG, Bone Density scan and Health check would be available to all? And with flexible opening hours and morning, afternoon, evening and weekend appointments available to suit a busy lifestyle? With Diagnostic Healthcare the dream has arrived.

Diagnostic Healthcare is an advanced diagnostic screening facility offering screening services unrivalled elsewhere in the North West. Located in the heart of Altrincham, the new clinic provides technologically advanced diagnostic screening services designed to reduce the risk of debilitating diseases for both NHS and private patients.

The clinic offers patients a complete body check-up and lifestyle plan that screens for major diseases and risk factors - all at surprisingly reasonable prices, making this state-of-the-art technology accessible to all. The clinic provides a very comprehensive range of tests (over 50 different tests),

including Well Woman, Well Men and Well child packages. Special packages meeting the needs of corporate clients and screenings for sports injuries are also available.

Other specialist tests such as Bone Density scanning using a state-of-the-art DEXA machine is available (this method is normally only accessible in certain hospitals). This is particularly helpful in detecting potential problems such as osteoporosis, which affects one in every two women and one in every five men over 50.

Ultrasound screening for detecting abnormalities in various organs for example heart, kidneys, bladder, liver and ovaries is performed by

qualified radiologists. Ultrasound is also an important tool to assist the diagnosis in breast abnormalities and to plot progress during pregnancy.

Exercise ECG and resting ECG are available as well as simple blood tests and comprehensive allergy testing, which can be tailor-made to meet the client's requirements.

Appointments can be booked within 24 to 48 hours, and the results are ready within 48 hours of consultation.

The combination of quality professional medical standards, a relaxed atmosphere, and state-of-the-art equipment makes the experience a pleasant one.
